The Compressor Station No. 1 on the Scratov-Yoccow gas tipe linwas about 50 km northwast of Caratov and 25 km contheast of Atkarsk,
1 to 2 km from the railroad station in Kologrivovka, Savatov Chlast.
The Compressor Station, covering an area of 100 x h00 meters, had
a cooling instellation, to water basins, one water tower, one compressor house, a
power station, saveral workshops, administration buildings, garages
and residential buildings. The pas tanks served for gas filtering.
The pumping station, the compressor house and the power station had
several suction and pressure machines, Diesel units, light machines
and the necessary pressure regulators and measuring instruments.
Part of the machinery was of American make. Some machines mostly the
motors and generators were manufactured by Siemens. The construction
of the stat on started immediately after the war. It was put into
operation in December 1946.
